Project Control ascertains the BUDGETARY guidelines, FAIR billing and QUALITY implementation

CORE IDEOLOGIES

CORE PURPOSE

To enrich customers life by Quality Construction along with trust and creativity, high quality standards and a spirit of benevolence and to contribute towards nation's prosperity by building compassionate entrepreneurs

CORE VALUES

Gaining Trust through Customer Satisfaction

With an Optimistic Attitude, do More with less and deliver WOW through Service

Committed to invest Smart Work for Creativity, Quality and Value-addition

Merit based Opportunities for those with Entrepreneurial Attitude

Pursuing Excellence by facing Challenges head-on, Learning and Growing

VISION 2025

To be one of the top ranking construction company in the world and to transform thousand acres of barren land into a green habitat for humans, animals & birds to co-exist

We INTEGRATE the BEST of CRAFTSMANSHIP with LABOUR management and ensure every target-line is met to your satisfaction

SERVICES

CONSTRUCTION CONTRACTING

WE BASICALLY OPERATE ON THREE MODELS:

Direct Contract

We estimate the project work; conduct quantity surveying, work on its commercials and timelines to present a quote to you. Once approved, we start with the execution and monitor every task, every milestone at micro and macro-levels. We integrate the best of craftsmanship with labor management and ensure every target-line is met to your satisfaction. A dedicated team of Project Control ascertains the budgetary guidelines, fair billing and quality implementation. Upon successful completion, a thorough documentation of the project is submitted for approval and handover. Throughout the journey we work very closely with the clients, Architects and PMC (if any) to ensure a flawless execution and smooth transition.

Tenders

We also participate in tenders and bid for various projects from different private bodies and trusts. We do a thorough study of the tender published and provide a custom-designed solution. In such cases, once we are awarded with the project, we carry on with the actual execution of the project.

Turnkey

In this scenario we employ our architect, PMC and Contractors to execute the project right from seeking relevant permissions, designing, construction, landscaping and final handover with lock and key.

We strictly focus on
HIGH QUALITY
STANDARDS of material,
craftsmanship and delivery.
It is a continuous process.

SERVICES

QUALITY MANAGEMENT

Delivering highest standards of quality is one of the most important values **Impact Infraheights Pvt. Ltd.** brings to its clients and the end users. In fact our emphases on using only the high quality materials, manufacturing processes, laborers and final delivery have helped us build credibility in the market. It's an intrinsic value that we implement in all walks of our life. We have an internal Project Control department which includes Quality Managers who perform scheduled as well as surprise checks and ensure that only the best output is delivered to the client. We also have these checks conducted through our associated who

are quality management experts with an experience of over 30-35 years. Besides, we have inspection guidelines based on industry standards and checklists that cover every aspect of construction. This is something that we ourselves enforce on our work without waiting for the client's request.

The following schematic broadly represents our philosophy of quality control plans and Inspection & Test Plans. Though these are guidelines, the actual methods and test plans tend to be more detailed.
